PROFESSIONAL SUMMARY

Full-Stack Web Developer specializing in Next.js, React.js, Node.js, and Express.js with expertise in relational (PostgreSQL, MySQL) and NoSQL (MongoDB) databases. Proven ability to build scalable, production-ready applications with strong foundation in SEO optimization, REST API development, and database schema design. Open to Remote / Relocation across India.

EXPERIENCE

Full-Stack Web Developer Intern

Mar 2026 – Present

AIKING SOLUTIONS

Remote

- Developed responsive, production-grade interfaces using Next.js and React.js, improving overall user engagement
- Built RESTful APIs with Node.js/Express.js covering authentication, data management, and booking workflows
- Optimized page load performance via Next.js SSR/SSG strategies and implemented on-page SEO best practices
- Designed and optimized relational database schemas leading to measurable improvements in query performance
- Developing a Chrome Extension integrated with a Next.js backend to extend browser-based productivity features for end users
- Maintained code quality and resolved production issues through structured Git branching and code-review workflows
- *Proof of Experience:* [View Details](#)

PROJECTS

API Monitoring & Incident Response Platform | Next.js, Node.js, MongoDB, Redis, BullMQ

Live | GitHub

- A SaaS-style infrastructure monitoring tool that continuously tracks health, latency, and uptime of multiple external API endpoints — similar in concept to AWS Status Page or Better Uptime
- Background workers powered by BullMQ and Redis queues perform asynchronous, scheduled health checks without blocking the main application thread; incidents are auto-detected and auto-resolved when services recover
- Dashboard provides real-time service status indicators, latency trend charts, a public-facing status page, and SLA compliance reports, giving teams full visibility into their API ecosystem

FoodieFly | Next.js, Node.js, Express.js, MongoDB, Socket.io, JWT

Live | GitHub

- A full-featured online food delivery platform where customers can browse restaurant menus, place orders, and track delivery in real time via Socket.io-powered live updates
- Implements JWT-based authentication with role-based access control separating customer, restaurant owner, and admin roles; admin dashboard enables restaurant onboarding, menu management, and order oversight
- Server-side rendered with Next.js for fast initial page loads and metadata-driven SEO, improving organic search discoverability for restaurant listings

CineCircle | Next.js, Node.js, Express.js, PostgreSQL, Socket.io

Live | GitHub

- A community-driven social platform for movie enthusiasts to discover films, write reviews, rate titles, and engage in real-time discussions via Socket.io-based chat rooms
- Backend powered by a normalized PostgreSQL schema with proper indexing for fast lookups across users, movies, reviews, and relationships; RESTful APIs handle all CRUD operations with high reliability
- Applied Open Graph meta tags and JSON-LD schema markup to boost SEO and enable rich link previews when sharing movie pages on social media

LMS — Learning Management System | Next.js, Node.js, Express.js, MySQL, JWT

Live | GitHub

- A role-based e-learning platform supporting student enrollment, course content delivery, progress tracking, and instructor course management under a single unified interface
- MySQL schema uses foreign key constraints and normalized relational tables for students, courses, enrollments, and assignments; query optimization and server-side caching significantly reduced API response time
- JWT authentication enforces strict role separation between students, instructors, and admins, ensuring secure access to the appropriate features for each user type

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js (SSR/SSG), Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.io, BullMQ, Redis, Nodemailer

Databases: PostgreSQL, MySQL, MongoDB, Schema Design, Query Optimization, Indexing, Normalization

SEO & Tools: On-Page SEO, Local SEO/GEO, Metadata Optimization, Chrome Extension Development, Git, GitHub, Vercel, Postman, Agile

EDUCATION

Greater Kolkata College of Engineering & Management

Kolkata, West Bengal

B.Tech in Computer Science & Engineering — CGPA: 7.56/10

2022 – 2026

Shyamnagar Sri Ramkrishna Vidhyamandir

West Bengal

Higher Secondary (WBCHSE) — Science (PCMB) — 66.2%

2019 – 2021
