PROFESSIONAL SUMMARY

Full-Stack Web Developer specializing in Next.js, React.js, Node.js, and Express.js with expertise in relational (PostgreSQL, MySQL) and NoSQL (MongoDB) databases. Proven ability to build scalable, production-ready applications with strong foundation in SEO optimization, REST API development, and database schema design. Open to Remote / Relocation across India.

EXPERIENCE

Next.js Developer Intern

Mar 2026 – Present

AIKING SOLUTIONS

Remote

- Developing a Chrome Extension that automates LinkedIn job applications and auto-fills forms with accurate user data
- Built browser automation workflows using JavaScript and Node.js to handle dynamic multi-step application processes
- Integrated the extension with a Next.js backend for user profile management and centralized automation handling
- Implemented intelligent form-field detection and automated data mapping across different job portals
- Maintained scalable APIs, optimized automation performance, and resolved production-level issues through structured Git workflows
- *Proof of Experience:* [View Details](#)

PROJECTS

CodeSight — Code Visualization Desktop IDE | *Electron, TypeScript, Docker, Supabase, PostgreSQL* GitHub | Release

- Built a cross-platform Electron desktop IDE that visualizes code execution line-by-line with live stack, heap, and variable-state tracking to help beginners understand runtime behavior interactively
- Implemented a secure multi-language execution engine supporting C, C++, Java, JavaScript, and Python using Docker-isolated runtime containers with stdin handling, execution monitoring, timeout protection, and process sandboxing
- Designed an educational execution visualizer featuring animated memory updates, stack-frame visualization, execution playback controls, and plain-English runtime explanations synchronized with Monaco Editor execution flow
- Integrated Supabase PostgreSQL for authentication, cloud snippet persistence, execution history tracking, and user-specific workspace synchronization across desktop sessions
- Engineered a fully responsive modern IDE-style interface optimized for laptops and desktop environments using Tailwind CSS, Framer Motion, and modular React component architecture

API Monitoring & Incident Response Platform | *Next.js, TypeScript, Node.js, MongoDB, Redis, BullMQ* Live | GitHub

- A SaaS-style infrastructure monitoring tool that continuously tracks health, latency, and uptime of multiple external API endpoints — similar in concept to AWS Status Page or Better Uptime
- Background workers powered by BullMQ and Redis queues perform asynchronous, scheduled health checks without blocking the main application thread; incidents are auto-detected and auto-resolved when services recover
- Dashboard provides real-time service status indicators, latency trend charts, a public-facing status page, and SLA compliance reports, giving teams full visibility into their API ecosystem

FoodieFly | *React.js, Node.js, Express.js, MongoDB, Socket.io, JWT*

Live | GitHub

- A full-featured online food delivery platform where customers can browse restaurant menus, place orders, and track delivery in real time via Socket.io-powered live updates
- Implements JWT-based authentication with role-based access control separating customer, restaurant owner, and admin roles; admin dashboard enables restaurant onboarding, menu management, and order oversight
- Built a scalable backend using Node.js and Express.js with MongoDB, implementing efficient data modeling and JWT-based authentication to handle user sessions, orders, and real-time updates via Socket.io

CineCircle | *React.js, Node.js, Express.js, MongoDB, Socket.io*

Live | GitHub

- A community-driven social platform for movie enthusiasts to discover films, write reviews, rate titles, and engage in real-time discussions via Socket.io-based chat rooms
- Developed RESTful APIs with optimized MongoDB data models and indexing, ensuring efficient handling of user activity, movie reviews, and chat features via Socket.io
- Applied Open Graph meta tags and JSON-LD schema markup to boost SEO and enable rich link previews when sharing movie pages on social media

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js (SSR/SSG), Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.io, BullMQ, Redis, Nodemailer

Databases: PostgreSQL, MySQL, MongoDB, Schema Design, Query Optimization, Indexing, Normalization

SEO & Tools: On-Page SEO, Local SEO/GEO, Metadata Optimization, Chrome Extension Development, Git, GitHub, Vercel, Postman, Agile

EDUCATION

Greater Kolkata College of Engineering & Management

Kolkata, West Bengal

B.Tech in Computer Science & Engineering — CGPA: 7.56/10

2022 – 2026

Shyamnagar Sri Ramkrishna Vidhyamandir

West Bengal

Higher Secondary (WBCHSE) — Science (PCMB) — 66.2%

2019 – 2021
