SUMMARY

Full Stack Web Developer specializing in Next.js, React.js, Node.js, and Express.js with expertise in PostgreSQL, MySQL, and MongoDB. Proven ability to build scalable, production-ready applications with a strong foundation in **SEO optimization**, **REST API development**, and **database schema design**. Open to Remote / Relocation across India.

EXPERIENCE

Next.js Developer Intern

Apr 2025 – June 2026

AIKING SOLUTIONS | Internship | Remote

- Developing a **Chrome Extension** automating LinkedIn job applications and auto-fill across multiple portals, **reducing form-filling time by ~80%**.
- Designed and optimized responsive Next.js web applications, implementing **SSR and SSG** to enhance overall performance and user experience.
- Implemented intelligent form-field detection with automated data mapping, achieving **95%+ field accuracy** across diverse job portal layouts.
- Maintained scalable APIs and resolved production bugs via structured Git workflows, keeping **zero critical downtime**.

PROJECTS

CodeSight – Code Visualization Desktop IDE

[GitHub Release](#)

Electron, Next.js, TypeScript, Docker, Supabase, PostgreSQL

- Cross-platform Electron IDE with line-by-line execution visualization, featuring **live stack, heap, and variable tracking** across 5 languages (C, C++, Java, JS, Python).
- Built a Docker-isolated execution engine with timeout protection and sandboxing, paired with an **animated stack-frame visualizer** providing plain-English runtime explanations.
- Integrated Supabase PostgreSQL for authentication and cloud sync, securing **100% cross-session workspace persistence**.

SnapScroll – Long Screenshot Capture Tool

[Download](#)

C#, .NET 8, WPF, MVVM, Win32 API, GDI+, XAML

- Developed a Windows desktop screenshot utility capable of capturing and stitching **100+ viewport frames** into a single high-resolution scrolling image.
- Built a custom overlap-detection and frame-deduplication engine that improved stitching accuracy and **reduced duplicate content by 90%+** across long capture sessions.
- Integrated global hotkeys, region selection, real-time capture overlays, and automated image export, supporting screenshot generation for websites, PDFs, documentation pages, and chat applications.

API Monitoring Platform

[Live](#) | [GitHub](#)

Next.js, TypeScript, Node.js, MongoDB, Redis, BullMQ

- SaaS infrastructure monitoring tool designed to track **health, latency, and uptime** of multiple API endpoints in real time.
- Utilized BullMQ + Redis async health checks to **reduce incident detection lag by 70%** with auto-resolution capacities upon service recovery.
- Designed a real-time dashboard with latency charts, public status pages, and SLA compliance reports that **cut on-call overhead by 50%**.

SKILLS

AI Engineering: AI agents, LLM orchestration, RAG, tool use, DOM reasoning, speech-to-text, Gemini and OpenAI APIs

AI-Assisted Development: Claude Code, OpenAI Codex, Cursor, GitHub Copilot, AI-native IDEs, agentic coding workflows

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js (SSR/SSG), Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.io, BullMQ, Redis, Nodemailer

Databases: PostgreSQL, MySQL, MongoDB, Schema Design, Query Optimization, Indexing, Normalization

SEO & Tools: On-Page SEO, Local SEO/GEO, Metadata Optimization, Chrome Extension Dev, Git, GitHub, CI/CD, Vercel, Postman, Agile

EDUCATION

B.Tech in Computer Science & Engineering

2022 – 2026

Greater Kolkata College of Engineering & Management | CGPA: 7.52/10

Higher Secondary, WBCHSE (2021) — 66%
